**PASTE PRODUCTION STORAGE MECHANISMS**

**VACUUM DISC FILTERS**

FLSmidth Minerals offers a broad range of proven EIMCO and Dorr-Oliver thickening and dewatering equipment. Our valued experience includes the installation of over 10,000 thickeners and clarifiers around the world, including the standard for Paste thickening technology: EIMCO® Deep Cone® Paste Thickeners!

Our installations cover a number of applications operating in the paste regime: surface stacking of tailings, mine backfill of tailings, autoclave feed, sub-aqueous deposition of tailings, kiln feed, and CCD.

To maximize your tailings management, rely on FLSmidth Minerals for the highest solids concentration, the highest torque, and highest rate thickeners! Let us help you tackle your specific requirements.
